IDENTIFIERS	*Alabama

ABSTRACT

This three-volume document covers 16 Alabama public 4-year colleges and universities, 18 Alabama private 4-year and 2-year colleges and universities, and 35 Alabama public 2-year institutions, and provides a list of all instructional programs approved by the Alabama Commission on Higher Education as of August 30, 1993. The volumes are organized into two sections. Section A lists programs by field of study, and Section B lists programs by institution. Programs in the inventory are classified according to the standard taxonomy, "Classification of Instructional Programs." Each inventory entry reflects the program title, degree(s) offered, accreditation if any, and date the program became inactive if appropriate. Accrediting agencies include only those agencies recognized by the Council on Postsecondary Accreditation (COPA) and the U.S. Department of Education. Institutions have 5 years from the inactive date to reinstate a program, provided evidence is offered that the program has adequate resources and student demand to support reinstatement. Section B provides information on instructional programs by institution and lists fields of study, degrees offered, accreditation, and active/inactive status. Also included is a list of program categories in the taxonomy. Appendixes contain abbreviations used for institutions, degree titles, and accrediting agencies. (JB)

DESCRIPTION OF AGENCY FUNCTIONS

Created by the Legislature in 1969, the Commission is charged with the responsibility of coordinating public higher education in Alabama.

The Commission is devoted to representing the citizens' higher education interests to the Governor and Legislature, while at the same time faithfully presenting the needs of the colleges and universities to the state.

In carrying out its responsibilities to approve new programs, review existing programs, formulate an annual budget recommendation, coordinate student financial aid programs and chart long-range goals for higher education, the Commission matches the strengths of the public institutions with the state's available financial resources.

To ensure that decisions are made with an awareness of the educational and financial consequences, the Alabama Commission on Higher Education provides data; responds to inquiries; conducts studies, and offers other assistance on higher education matters to the Governor, the Legislature, the institutions and the citizens in Alabama.

The Commission is composed of 12 members, 10 appointed by the Governor, one by the Lieutenant Governor and one by the Speaker of the House. Commissioners serve staggered nine-year terms.

APPENDIX C: SPECIALIZED ACCREDITING AGENCIES RECOGNIZED BY COPA AND/OR USDE WITH ABBREVIATIONS 183

FOREWORD

The 1993 edition of the Academic Program Inventory consists of three volumes. Volume I includes public four-year colleges and universities and provides a list of all instructional programs approved by the Alabama Commission on Higher Education as of August 30, 1993. Volume II includes the programs offered by the private colleges and universities in the State. Volume III provides a list of all programs offered by the community, junior, and technical colleges which were approved by the Commission as of August 30, 1993.

Volume I is organized into two sections. Section A lists programs by field of study, and Section B lists programs by institution. To conserve space, institutional names are abbreviated in Section A. For an explanation of the abbreviations, refer to Appendix A.

Programs in the Inventory are classified according to a standard taxonomy, Classification of Instructional Programs, developed by the National Center for Education Statistics (NCES). The CIP taxonomy facilitates a comparison of information not only among institutions in the State but also nationwide. A list of program categories used in the CIP taxonomy appears on pages xi and xii. For a detailed description of the CIP taxonomy, consult the following publication: Robert L. Morgan, E. Stephen Hunt, & Judith M. Carpenter, Classification of Instructional Programs, 1990 Ed., Washington, DC: Center for Education Statistics, U.S. Government Printing Office, (August 1991).

Each inventory entry reflects the program title, degree(s) offered, accreditation if any, and date inactive if appropriate. Since the Commission's data base includes approximately 150 separate and unique degree titles, abbreviations are used for the degrees. Appendix B provides a list of all degree titles and abbreviations used in this Inventory.

The accrediting agencies listed in the Inventory include only those agencies recognized by the Council on Postsecondary Accreditation (COPA) and the U.S. Department of Education (USDE). Space limitations require that the names of accrediting agencies be abbreviated. Appendix C gives a list of all accrediting agencies recognized by COPA and/or USDE and abbreviations.

If a program is inactive, a date will appear in the "Date Inactive" column which indicates the date this inactive status was recognized by the Commission. Institutions have five years from the inactive date to reinstate a program, provided evidence is offered that the program has adequate resources and student demand to support reinstatement. If a program has not been reinstated within five years after being placed on inactive status, it will be removed from the Inventory. Once an inactive program has been removed from the Inventory, it cannot be added back to the Inventory without undergoing the normal new program review process.

Teacher certification programs (B, A, AA) as approved by the State Department of Education are not listed in the Inventory. For a current inventory of those programs, consult Approved Teacher Education Programs which is published annually by the Alabama State Department of Education.

DESCRIPTION OF AGENCY FUNCTIONS

Created by the Legislature in 1969, the Commission is charged with the responsibility of coordinating public higher education in Alabama.

The Commission is devoted to representing the citizens' higher education interests to the Governor and Legislature, while at the same time faithfully presenting the needs of the colleges and universities to the state.

In carrying out its responsibilities to approve new programs, review existing programs, formulate an annual budget recommendation, coordinate student financial aid programs and chart long-range goals for higher education, the Commission matches the strengths of the public institutions with the state's available financial resources.

To ensure that decisions are made with an awareness of the educational and financial consequences, the Alabama Commission on Higher Education provides data; responds to inquiries; conducts studies; and offers other assistance on higher education matters to the Governor, the Legislature, the institutions and the citizens in Alabama.

The Commission is composed of 12 members, 10 appointed by the Governor, one by the Lieutenant Governor and one by the Speaker of the House. Commissioners serve staggered nine-year terms.

FOREWORD

The 1993 edition of the Academic Program Inventory consists of three volumes. Volume I includes public four-year colleges and universities and provides a list of all instructional programs approved by the Alabama Commission on Higher Education as of August 30, 1993. Volume II includes the programs offered by the private colleges and universities in the State. Volume III provides a list of all programs offered by the community, junior, and technical colleges which were approved by the Commission as of August 30, 1993.

Volume II is organized into two sections. Section A lists programs by field of study, and Section B lists programs by institution. To conserve space, institutional names are abbreviated in Section A. In addition, Faulkner University has some programs that are offered only at branch campuses; these are indicated by letter abbreviations following the program titles. Faulkner's programs without this annotation are offered only at the main campus. For an explanation of the abbreviations, refer to Appendix A.

Programs in the Inventory are classified according to a standard taxonomy, Classification of Instructional Programs, developed by the National Center for Education Statistics (NCES). The CIP taxonomy facilitates a comparison of information not only among institutions in the State but also nationwide. A list of program categories used in the CIP taxonomy appears on pages xi and xii. For a detailed description of the CIP taxonomy, consult the following publication: Robert L. Morgan, E. Stephen Hunt, & Judith M. Carpenter, Classification of Instructional Programs, 1990 Ed., Washington, DC: Center for Education Statistics, U.S. Government Printing Office, August 1991.

Each inventory entry reflects the program title, degree(s) offered, accreditation if any, and date inactive if appropriate. Since the Commission's data base includes a large number of separate and unique degree titles, abbreviations are used for the degrees. Appendix B provides a list of all degree titles and abbreviations used in Volume II.

The accrediting agencies listed in the Inventory include only those agencies recognized by the Council on Postsecondary Accreditation (COPA) and the U.S. Department of Education (USDE). Space limitations require that the names of accrediting agencies be abbreviated. Appendix C gives a list of all accrediting agencies recognized by COPA and/or USDE and abbreviations.

Teacher certification programs (B, A, AA) as approved by the State Department of Education are not listed in the Inventory. For a current inventory of those programs, consult Approved Teacher Education Programs which is published annually by the Alabama State Department of Education.

Programs resulting in the awarding of a certificate degree at a four-year institution are listed in the Inventory only if the certificate is a requirement for employment. In regard to two-year institutions (community, junior, and technical colleges), certificate programs are listed only if they are at least one academic year (3 quarters) of full-time study or the equivalent.

DESCRIPTION OF AGENCY FUNCTIONS

Created by the Legislature in 1969, the Commission is charged with the responsibility of coordinating public higher education in Alabama.

The Commission is devoted to representing the citizens' higher education interests to the Governor and Legislature, while at the same time faithfully presenting the needs of the colleges and universities to the state.

In carrying out its responsibilities to approve new programs, review existing programs, formulate an annual budget recommendation, coordinate student financial aid programs and chart long-range goals for higher education, the Commission matches the strengths of the public institutions with the state's available financial resources.

To ensure that decisions are made with an awareness of the educational and financial consequences, the Alabama Commission on Higher Education provides data; responds to inquiries; conducts studies, and offers other assistance on higher education matters to the Governor, the Legislature, the institutions and the citizens in Alabama.

The Commission is composed of 12 members, 10 appointed by the Governor, one by the Lieutenant Governor and one by the Speaker of the House. Commissioners serve staggered nine-year terms.

FOREWORD

The 1993 edition of the Academic Program Inventory consists of three volumes. Volume I includes public four-year colleges and universities and provides a list of all instructional programs approved by the Alabama Commission on Higher Education as of August 30, 1993. Volume II includes the programs offered by the private colleges and universities in the State. Volume III provides a list of all instructional programs offered by the community, junior, and technical colleges which were approved and recognized by the Commission as of December 10, 1993.

Volume III is organized into two sections. Section A lists programs by field of study, and Section B lists programs by institution. Where an institutional merger has occurred, separate inventories are maintained until Commission approval is granted for a programmatic merger. Likewise, no changes in institutional names are recognized in the Commission's Inventory until Commission approval occurs. To conserve space, institutional names are abbreviated in Section A. For an explanation of the abbreviations, refer to Appendix A.

Programs in the Inventory are classified according to a standard taxonomy, Classification of Instructional Programs, developed by the National Center for Education Statistics (NCES). The CIP taxonomy facilitates a comparison of information not only among institutions in the State but also nationwide. A list of program categories used in the CIP taxonomy appears on pages xi and xii. For a detailed description of the CIP taxonomy, consult the following publication: Robert L. Morgan, E. Stephen Hunt, & Judith M. Carpenter, Classification of Instructional Programs, 1990 Ed., Washington, DC: Center for Education Statistics, U.S. Government Printing Office, (August 1991).

Each inventory entry reflects the program title, degree(s) offered, accreditation if any, and date inactive if appropriate. Since the Commission's inventory data base includes a large number of separate and unique degree titles, abbreviations are used for the degrees. Appendix B provides a list of all degree titles and abbreviations used in the two-year inventory.

The accrediting agencies listed in the Inventory include only those agencies recognized by the Council on Postsecondary Accreditation (COPA) and the U.S. Department of Education (USDE). Space limitations require that the names of accrediting agencies be abbreviated. Appendix C gives a list of all accrediting agencies recognized by COPA and/or USDE and abbreviations.

If a program is inactive, a date will appear in the "Date Inactive" column which indicates the date this inactive status was recognized by the Commission. Institutions have five years from the inactive date to reinstate a program, provided evidence is offered that the program has adequate resources and student demand to support reinstatement. If a program has not been reinstated within five years after being placed on inactive status, it will be removed from the Inventory. Once an inactive program has been removed from the Inventory, it cannot be added back to the Inventory without undergoing the normal new program review process.
